Hello Everyone,

This is just to keep you in the loop and updated with the AIDA developments.

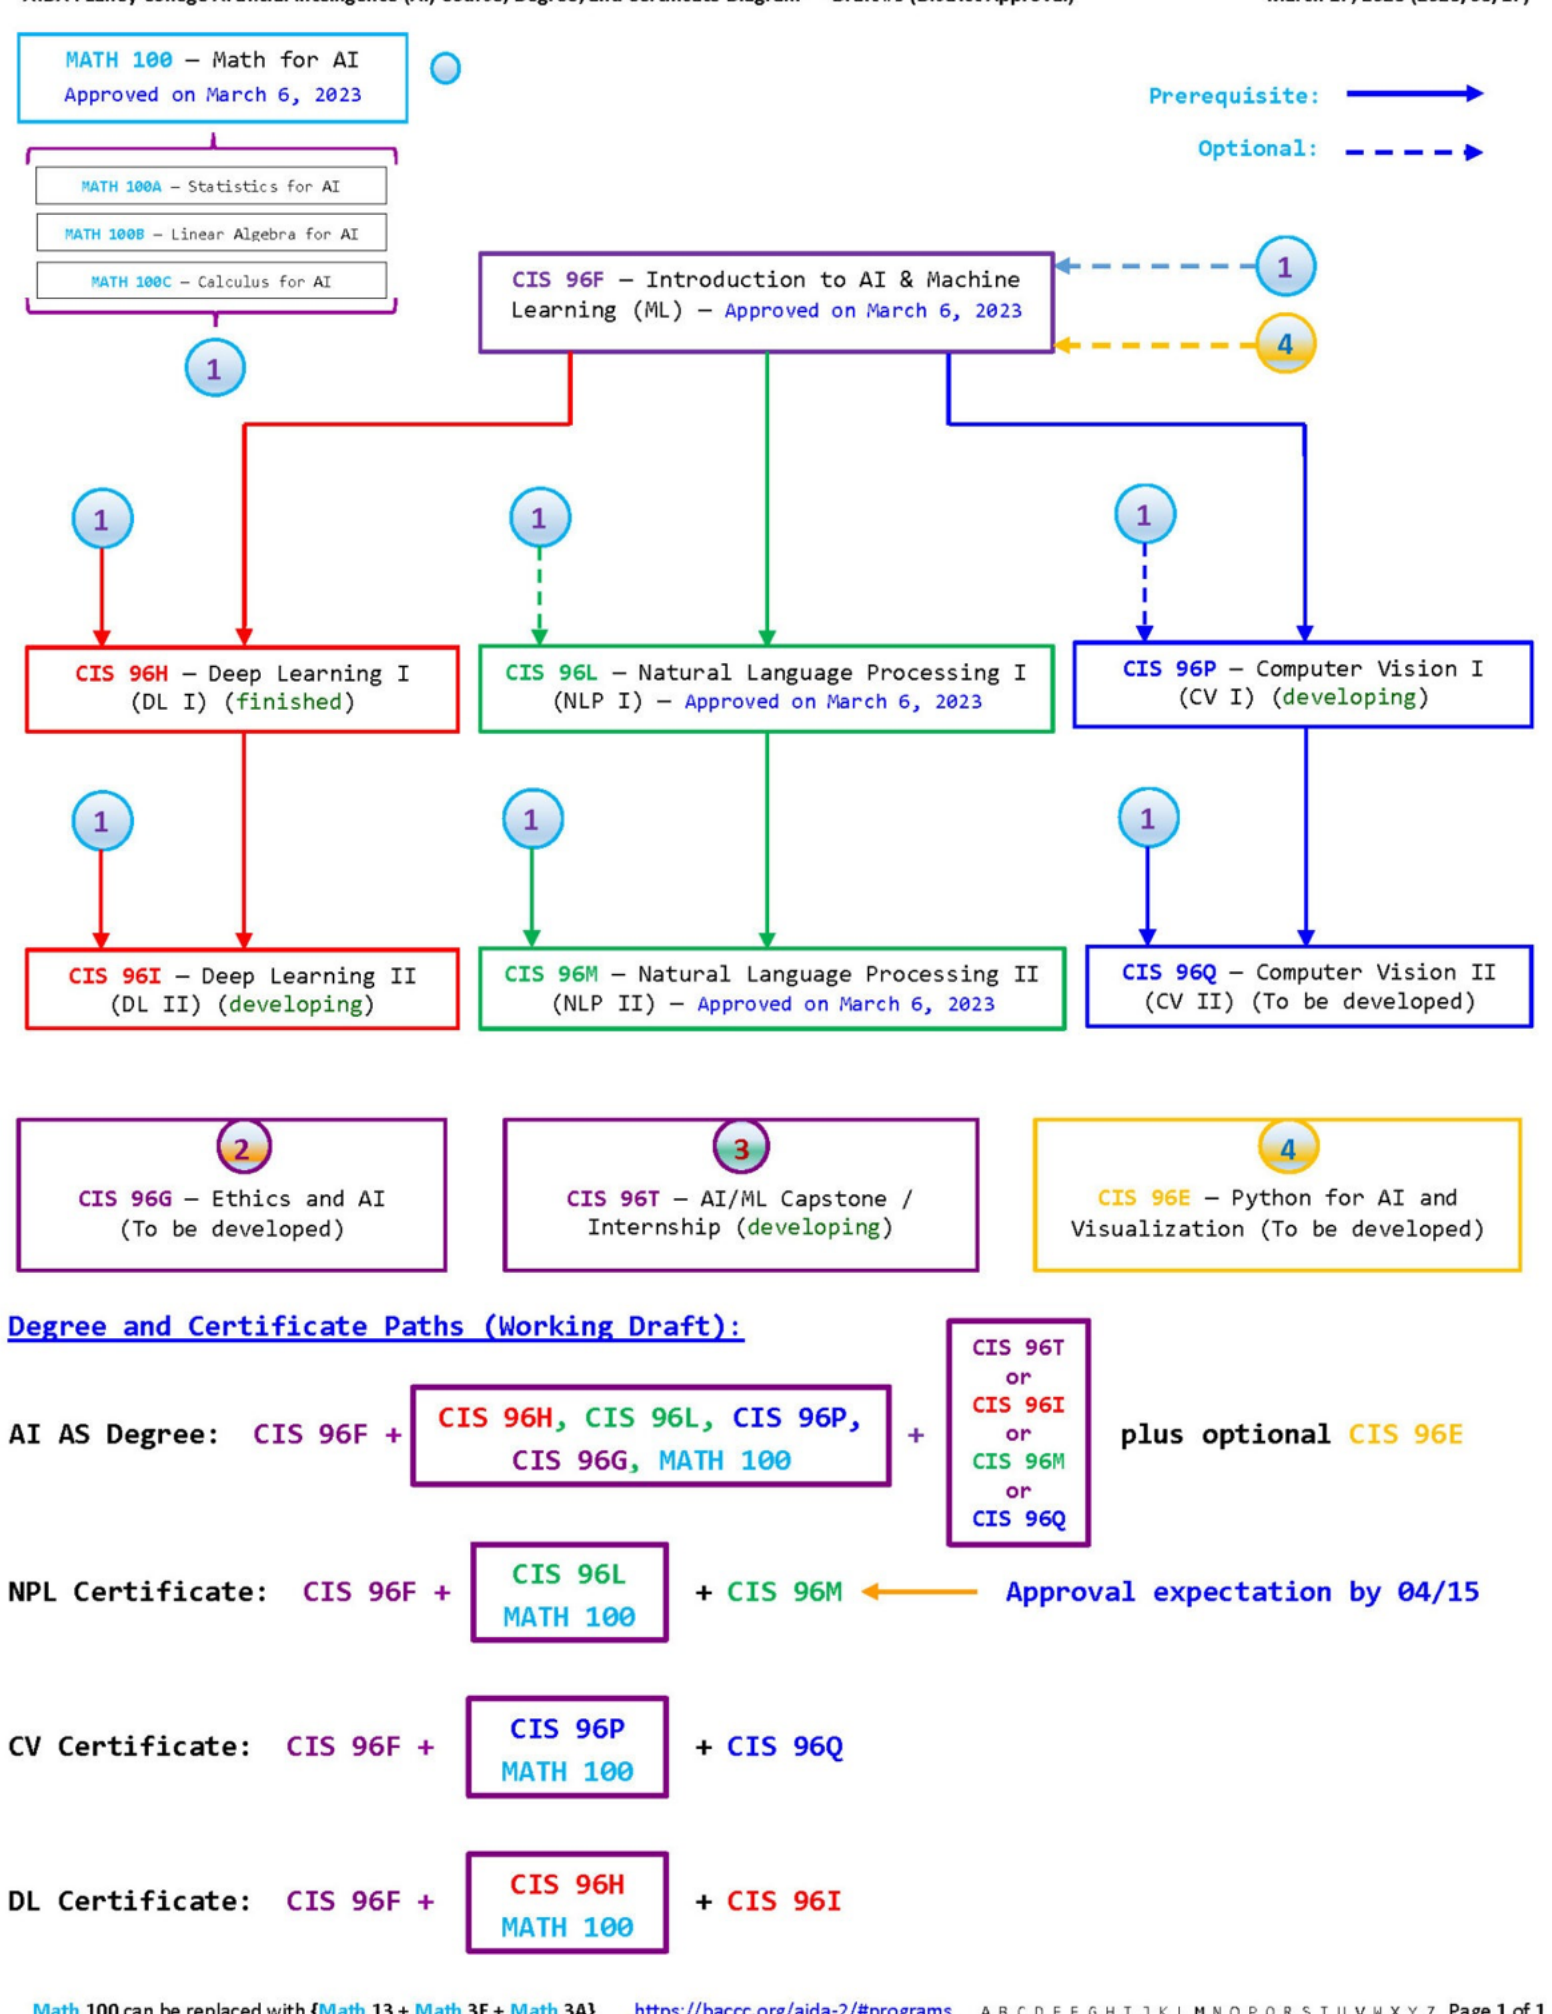

- We got the 4 courses (**CIS 96M**, **CIS 96L**, **CIS 96F**, and **Math 100**) approved by our district curriculum committee last week. They should be routed over to the State by now. I do not know how to get the info or track the progress on the state approval. Please share if you do!
- Our Laney curriculum co-chair Heather has been helping to complete the narrative of the CA on NLP. Heather asked for some info on similar programs. I compiled and forwarded the info with help from Angel, and Dan’s links plus search. We should have it done soon.
- The first Deep Learning I course (**CIS 96H**) is finished with the first draft. It is being used to complete a draft on the second course of Deep Learning II (**CIS 96I**). I hope to finish both of them in time to submit with the CA for NLP to our Laney CC early April.
- The AI Capstone course (**CIS 96T**) is being worked on. It should be finished before long.
- The Computer Vision I course (**CIS 96P**) has started. The CV series should be completed late this year or early next year.
- The Ethics and AI course (**CIS 96G**) will be started after I complete the DL series; I will try to get it done before the end of this summer.
- There are a couple of interesting AI courses and projects in the dream-pipe!

I also have the AI course chart updated and included on the right.

We appreciate all of the support and will call on you for more info and support along the way.

Many thanks and have a good day,

Tuan Nguyen MA
